

Rack Repair

When pallet rack damage exists in your warehouse it should not be ignored. The danger signs and the at-risk conditions should be evaluated by professionals to protect your employees, your products and avoid serious liability. Purdy Company is specifically trained to survey the damaged pallet rack and provide cost-effective solutions for rack repair. To get started, call Purdy Company now at 614-252-5201.

Damage is usually 48" or below

Benefits of using Rack Repair Kits

- **Cost-effective:** Repairing damaged uprights is often quicker and the most cost effective solution
- **Risk Management:** Protects your people and your assets
- **Efficient:** Minimal unloading or disassembly is necessary and most repairs are done within an hour
- **High ROI:** Provides a permanent solution to your pallet rack damage and generates long term safety in your facility
- **Standard Kits Sizes:** 24", 36" 48" (custom sizes available on request – may result in longer lead times)
- **Quick Turnaround:** On standard size kits (generally 1-2 weeks from order)

WHEN TO USE RACK REPAIR KITS

If you have fire suppression, protective netting, rack back, or any other items in and on your rack.

If you have extremely tall uprights, it is more difficult to maneuver around multiple levels of product and beams.

If building permits are needed to replace uprights. Normally, repairs do not require permits.

If there is damage to an upright in the middle of a long run of pallet rack.

Repair Kits Work With:
Pallet Rack • Structural Rack
Drive In Rack
Push Back Rack • Pick Modules
